

Texas Web Tutor

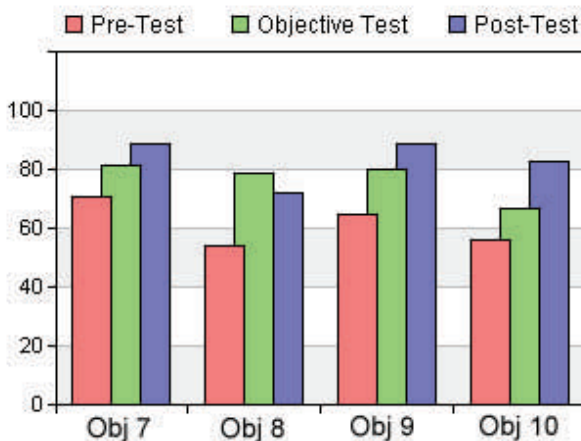

The original online math TAKS preparation program

"Texas Web Tutor is a great TAKS/TEKS-aligned online resource that makes a positive difference in a student's TAKS score while it facilitates the job of the teacher."

Camille Malone
Executive Director of Mathematics
Dallas ISD

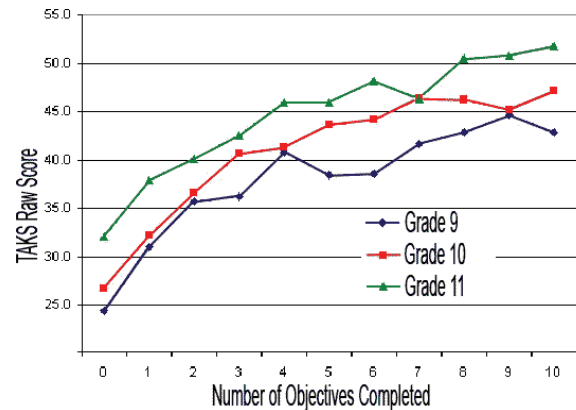

FEATURES

Texas Web Tutor is the most effective and affordable TAKS math preparation program available. It is completely web-based, which means there is nothing to download and students can use the program anywhere they have access to the Internet (*school, home, public library...*) 24 hours a day, 7 days a week. This versatility provides teachers with an alternate method of TAKS review outside of the classroom, allowing more class time to focus on specific course objectives.

Real Time Reporting

Texas Web Tutor allows educators to easily monitor the progress of their students. This helps schools and districts meet the requirements of the *No Child Left Behind Act* by providing teachers and administrators with the information they need to provide data-driven instructions.

Proven Effective

Implementation of the program as designed can lead to substantial gains in TAKS performance for participating students. And the more they use it, the better their results.

LOOK AT WHAT THE RESEARCH SAYS

The Dallas Independent School District performed a research study in 2006 on the effectiveness of Texas Web Tutor. Dorthea Weir, Ph.D. in the Department of Program Evaluation reported the following results:

“[In a comparison of] TAKS passing rates by grade and amount of time spent on the program, students who completed 30 hours or more, had passing rates of 91% at grade 9, 94% at grade 10, and 100% at grade 11.”

“At grade nine, 50% of Texas Web Tutor students passed the test, compared to 31% of other students in the same schools; at grade 10, 63% of program students passed, compared to 46% of other students; and at grade 11, 79% of program students passed, compared to 74% of other students.”

“The Texas Web Tutor program was effective at raising student’s TAKS Mathematics scores across Dallas ISD high schools with student populations that differed widely in ethnic, socioeconomic, and achievement characteristics.”
